

FSC CHAIN OF CUSTODY POLICY OF COMPOSAD S.r.l.

Composad S.r.l., setting the goal of not using new wood as a raw material and to manufacture their products by pursuing an environmentally friendly route, decided to use FSC certified particleboard panels and to implement a system of management of the FSC chain of custody.

Therefore the company's commitment is focused on:

- checking the origin of incoming materials;
- ensuring no wood from controversial sources is in their products bearing the FSC mark;
- training the personnel directly involved in the Chain of Custody System and in particular the personnel concerned in the management of supplies and control of incoming panels;
- suspending the application of the FSC mark if the finished product exceeds the maximum percentages allowed for minor components based on wood.

Composad S.r.l. states, as envisaged by FSC-POL-01-004, not to be directly or indirectly involved in the following activities:

- Illegal logging and sale of wood and forest products;
- Violation of human and traditional rights in forest activities;
- Destruction of high conservation values during forest activities;
- Significant conversion of forests into plantations or other non-forest use;
- Introduction of GMOs into forestry;
- Violation of the ILO Core Convention as defined in the ILO Declaration of Fundamental Principles and Rights at Work, 1998.

The Managing Director has designated a Head of the FSC chain of custody as the contact person for the implementation of this policy.

Viadana, 14th April 2014

Managing Director

Dr. Alberto Donvito
